INTERNATIONAL PUBLIC PROCUREMENT CONFERENCE

AUGUST 17-19 ■ SEATTLE, WASHINGTON

PUBLIC PROCUREMENT:
Professionalization & Capacity Building

www.nigp.org/ippc5

Driven by demand for further control over public spending, public procurement has become a key function of government. Significant technological changes, international trade and global competition have forced governments and public institutions to extend policy interests beyond cost minimization, and to pursue new challenges including innovation, competition, transparency and reforms. Further, policy makers have used public procurement as an effective policy tool.

The International Public Procurement Conference (IPPC) is the largest international public procurement conference dedicated to academic discourse and practitioner engagement. Thanks to the fertile mixture of practical experiences and academic research, IPPC draws over 400 academicians and experienced professionals from 59 countries. For 2012, IPPC aims to extend and deepen the topics of major interest that have their roots in the first IPPC event held in 2004.

CALL FOR PAPER PROPOSALS

We welcome papers that focus on public procurement from theoretical, empirical, practical and institutional perspectives. Suggested topics of focus (this is not an all-inclusive list):

- Public procurement and institutions (law, politics, public finance);
- Public procurement systems in developing and developed countries (capacity building, reforms);
- Lessons learned (case studies, benchmarking);
- Procurement and Innovation (new technologies, e-procurement, firms' investments in R&D/innovation);
- The role of standards in procurement markets;
- Accountability and transparency (preventing corruption, ethical codes) in public procurement;
- Competition and procurement (impact on SMEs, competitiveness, antitrust);
- 2nd generation procurement reform
- Procurement processes and performances;
- Public tendering (procedures, auction design);
- Handling socio-economic concerns in public procurement policies (environment, employment, SMEs);
- Administration of public procurement (structures, policies, centralization, decentralization) ; and
- Corporate governance models and public procurement.

Submission Deadline: September 1, 2011

*Please submit an abstract of up to 120 words (including paper title) by September 1, 2011 to:
